Not sure other than the RMP database. I did a quick google search and found this resource <http://naicscode.com/>

The SIC code for NitrogenousFertilizers is 2873

<http://naicscode.com/Search/MoreNAICSDetail.asp?N=325311#SICMatches>

Several reporters are asking about an online database where they can locate facilities storing ammonia anhydrous and ammonia nitrate. Does one exist? Is there a SIC code for fertilizer operations and is it public?

David
